Ashish Kumar Dash

LinkedIn: https://www.linkedin.com/in/ashish-dash-361ba12a1/ Email: dashash005@gmail.com
Github: https://github.com/Chiko005 Mobile: +91-8328950567

Skills

Languages: C/C++, Python, Java, PHP
Frameworks: React, Node.js, Next.js, Tailwind, Bootstrap
Tools/Platforms: MongoDB, MySQL, Mathematics, Maven, OS, Computer Networks
Soft Skills: Quick-Learning, Adaptability, Problem-Solving, Decision-Making

Projects

Water Wastage Monitoring using IOT | https://github.com/Chiko005/Flames2 Aug' 2025

- Engineered a real-time water usage monitoring platform featuring IoT data ingestion and Chart.js dashboards.
- Created the system using a React front end and Node.js/Express back end, utilising MQTT/HTTP protocols to collect consumption data from coded IoT devices.
- Implemented advanced anomaly detection and SMS alert systems to proactively indicate potential wastage and leaks, ensuring system scalability and responsiveness on AWS.

Tech Used: Utilised a full-stack MERN-adjacent architecture (React, Node.js/Express, MongoDB), integrating JWT authentication, Chart.js for visualisation, and deploying the solution on AWS.

Survey And Feedback | https://github.com/Chiko005/Survey-portal Apr' 2025

- Designed and programmed an anonymous web application for user feedback and surveys, emphasising user privacy and secure data storage.
- Provided an anonymous, intuitive interface where users can submit feedback and surveys. The platform ensured data integrity by processing and storing submissions securely in a dedicated database. Security features include the use of hashing to protect credentials and improved coding practices designed to mitigate vulnerabilities against common web attacks, such as cross-site scripting (XSS).
- Successfully enforced anonymity and instigated bot restrictions alongside quick action mechanisms to address rule violations in posting and commenting, ensuring a safe and authentic user environment.

Tech Used: Leveraged a classic LAMP-adjacent stack: HTML, Tailwind CSS, and JavaScript (Frontend), PHP (Backend), MySQL managed via phpMyAdmin (Database/Storage).

CPU-Scheduling | https://github.com/Chiko005/CPU-Schdeduling Apr' 2025

- Developed an interactive CPU Scheduling Simulator to visually demonstrate and compare complex Operating System process allocation strategies for educational and analytical purposes.
- Introduced diverse scheduling algorithms, including Round Robin, FCFS, SJN, and SRTF. Used Java Collections for efficient management of process queues and execution simulation logic.
- Constructed a performance analysis module to automatically calculate and compare key metrics like turnaround time, waiting time, and CPU utilisation, enabling the direct evaluation of algorithmic efficiency through Gantt charts.

Tech Used: Java (Core logic and Algorithms), Java Swing and AWT (for the interactive GUI and dynamic visualisation), Java Collections (for data structures/queue management).

Certificates

- MERN Stack Development | W3Grads | https://theangaarbatch.in/dashboard/event/592/certificate Aug' 2025
- Introduction to Hardware and Operating Systems | Coursera | https://coursera.org/verify/DES8IQK9WAMQ Sep' 2024
- The Bits and Bytes of Computer Networking | Coursera | https://coursera.org/verify/N96R0V1DMIA2 Sep' 2024
- Fundamentals on REDD+ E-Academy | United Nations REDD | https://shorturl.at/oVXj0 Dec' 2023

Extracurricular Activities

Community Development Work on Child Rights and Education | https://basundhara.org.in/ Jul' 2024
Worked at Basundhara Child Care Organisation | https://shorturl.at/xd2rl

Education

Lovely Professional University Jalandhar, Punjab
Bachelor of Technology Aug' 2023 - Present
Computer Science and Engineering**: CGPA: 8.4**

Christ H.S.S. Cuttack, Odisha
Intermediate**: Percentage: 70%** May' 2022 – May' 2023

S.S.V.M Cuttack, Odisha
Matriculation**: Percentage: 84%** May' 2020 – May'2021
